ABOUT ME

Results-driven Full Stack Developer focused on scalable web architectures and robust SaaS solutions. I specialize in engineering high-performance applications that bridge functional technology with seamless design.

SKILLS

FRONTEND

Html, Css, Javascript, JQuery, Typescript, React Js, Vue js, Next Js, Tailwind Css, Bootstrap, Sass.

BACKEND

Python, Firebase, MongoDB, Node Js.

OTHER TOOLS

Payment Integration tools (eg - Paystack, Stripe), SEO Tools (eg - Lighthouse), Wordpress, Version Control, Figma, Netlify, Vercel, Google Analytics, Visual Studio Code.

EXPERIENCE

Fullstack Developer - ALGORALIGN

Oct 2023 – May 2026 | Lagos, Nigeria

- Spearheaded UI/UX redesign using React.js, optimizing user interaction and streamlining site-wide navigation to enhance overall customer journey.
- Engineered and deployed a WhatsApp-based crowdfunding platform, enabling secure, GoFundMe-style donations for community projects directly through the messaging app.
- Implemented mobile-first responsive design principles across the application, resulting in a significant measurable increase in user engagement from mobile devices.
- Developed and maintained web applications using a combination of front-end and back-end technologies.

Frontend Developer - JUSTWEB TECHNOLOGY

Mar 2021 – Nov 2022 | Lagos, Nigeria

- Spearheaded UI/UX redesign using React.js, optimizing user interaction and streamlining site-wide navigation to enhance overall customer journey.
- Engineered and deployed a WhatsApp-based crowdfunding platform, enabling secure, GoFundMe-style donations for community projects directly through the messaging app.
- Implemented mobile-first responsive design principles across the application, resulting in a significant measurable increase in user engagement from mobile devices.
- Developed and maintained web applications using a combination of front-end and back-end technologies.

PROJECTS

Algoralign: Programmable Payment & SaaS Platform |

Spearheaded a UI/UX redesign using React.js to improve navigation. Engineered a WhatsApp-based crowdfunding solution that facilitated community project donations through automated messaging flows. Designed scalable architectures to automate payment workflows and logistics operations.

Kicks24: E-commerce Storefront |

Built and optimized a custom e-commerce web store focused on retail inventory management, performance, and seamless product browsing for high-traffic sales.

Hooqq: Social Commerce Integration |

Developed a multi-vendor SaaS platform designed to sync inventory automatically across social media channels and branded storefronts, enabling a "List Once, Sell Everywhere" user experience.

EDUCATION

UNIVERSITY OF THE PEOPLE

[University of the people \(UOPEOPLE\)](#) is an online university that gives students flexible schooling capabilities.
